List medications, purpose and dosages

Canine Hydrotherapy is performed in warm water (30-32 degrees) pool with a qualified Hydrotherapist. The therapist will develop a plan based on the dog's history in consultation (via this form) with the Veterinarian. This plan will aim to decrease inflammation, increase range of motion, provide pain management, increase proprioception and muscle tone. All of the above will increase the dog's confidence and comfort. The sessions will last to a maximum of 30 minutes swim time. The dog's heart rate, breathing and capillary refill time will be monitored throughout the session.

I hereby release	_ (dog's name) for hydrotherapy at Frisky Pup
Canine Hydrotherapy & Fitness located at 11259	10a Avenue NW, Edmonton AB T6J 6S3
